

Geotextiles: GEOFORT

Standard Program

- ✓ Nonwovens used for civil engineering, the rail industry and as environmental protection
- ✓ Made of PP or PES material
- ✓ Does not contain any dangerous chemical compounds
- ✓ Resistant to fungi and mold
- ✓ Absorbs the dynamic tension and prevents the displacement of individual soil layers during railway track and road construction
- ✓ Allows free movement of water and gas, prevents the migration of soil particles and therefore the risk of landslides
- ✓ Particularly well-suited for the construction of dams, water basins and embankments as well as to regulate rivers and reinforce embankments
- ✓ GEOFORT significantly improves the mechanical parameters of subsoil
- ✓ Available as rolls

QUALITY	WEIGHT	ROLL LENGTHS	ROLL WIDTHS	COLOR	CORE
Polypropylene	90-1000 g/m ²	50-1000 m	1,5, 2, 3, 6 m	white	76 mm
Polyester	90-1000 g/m ²	50-1000 m	1,5, 2, 3, 6 m	white, light blue	76 mm
